ANGEL® LEARNING MANAGEMENT SUITE

Introductory Instructor Training – Online Format

The online ANGEL Instructor Training course provides a deep understanding of ANGEL's most commonly used content development and learning management features. The self-paced course is formatted in twelve lessons. Each lesson contains multiple hands-on activities to familiarize the participant with common instructor tasks and a checkpoint assessment. The course presents detailed concepts in a "walkthrough" format, generally discussing tools by category and in the order they are presented. Each online course is facilitated by an experienced ANGEL trainer who is available to answer questions as they arise.
